

To Whom This May Concern,

I am a full-stack web developer with a good eye for design. I enjoy breaking problems down to their smallest parts to fully understand how something works in order to find creative solutions for out of the ordinary problems. I am passionate and inspired by visual aesthetics, good design, and clean, precise code. I am driven to create interactive products, pieces, works of art, and spaces shaped around human experience and expression as well as intuitive and efficient functionality.

To give you an idea of my history, I graduated summa cum laude from Cornish College of the Arts with a Bachelors of Fine Arts in Dance in 2006. I have spent many years performing, choreographing, and teaching, however something has been missing. I am very creative, but I have always been a very analytical thinker too. Science and Math were my best subjects in school and I love building things and trying to understand how they work. My interest in web development was sparked by my partner and the majority of our friends who are in the industry. I enrolled and recently completed a full-stack web development immersive through General Assembly. The course was 40 hours a week of in-class time along with required nightly deliverables and projects to complete after hours. It was a fast-paced learning environment in which we created apps with HTML5, CSS3, JavaScript, jQuery, Express, Node.js, Ruby on Rails, Postgres, Mongo, and Angular. The course was definitely not for the weak-hearted or slow to learn student. I am so happy I took the leap to enroll in this course as I have affirmed that I need to be in this field.

With my history of being a dancer and artist, I feel I have some unique skills to offer the web development world. Aside from the logically-wired brain and ability to completely lose track of time when involved in programming, I am creative and think outside the box. I am extremely dedicated and focused; I show up every day, ready to work and push myself to the max. I can work and think both independently as well as with a group, picking-up others' direction quickly. I know I am capable of whatever is put in-front of me as well as realize that there is always more to learn.

This position is very inline with my values and what I am looking for in a job. I am happy to answer any questions you may have and I hope you will consider me for the position. I look forward to speaking with you soon.

Sincerely,

Jamie Karlovich
